

Preparing and feeding for two sugar gliders.

Step 1

Boil three large eggs for 15 minutes. After 15 minutes remove and let cool. Peel eggs and discard shells.

Step 2

Measure 2 1/2 cups of water.

Step 3

Measure 1/2 cup of honey.

Step 4

Measure 1 tablespoon of Bee Pollen.

Step 5

Measure 1/4 cup wombaroo powder.

Step 6

Place all ingredients in a blender. Blend until thoroughly mixed.

Step 7

Pour a tablespoon of mix into each cavity of an ice cube tray. Look for the silicone 15 compartment type. This will make about a month of food for 2 gliders. Place both trays in freezer.

Step 8

Cut fruit up into small pieces about 1/4" size. Fruit can be strawberries, apples, oranges, grapes, pineapple, blackberries, raspberries. See back page for complete list.

Step 9

Cut vegetables into small pieces. These can be carrots, broccoli, cauliflower, peas, string beans. Put any extra fruit and vegetables in a zip lock bag or container.

Step 10

Place 2 tablespoons of fruit, and 2 tablespoons of vegetables in a 4 oz. crock pet bowl. Sprinkle 1/4 teaspoon Pet Pro Sprinkles on top of food. Place remainder of food in refrigerator.

Step 11

In another bowl, place one teaspoon of Pet Pro Dry Supreme dry food. Never allow dry food to get wet. They won't eat it.

Step 12

Take one frozen cube and place in the third bowl. We usually feed 3 hours before they wake up so the cube has melted.

Safe Vegetables & Fruits

Apple
Apricot
Asparagus
Aubergine (Eggplant)
Avocado
Banana
Beets
Blackberries
Blueberries
Broccoli
Brussels Sprout
Butternut Squash
Carrot
Celery
Cherry
Corn
Courgette (Zucchini)
Cucumbers
Dates
Elderberry
Endive
Fennel
Fig
Grapes
Green Beans
Guava
Jerusalem Artichoke
Kiwi
Kumquats
Lettuce (all types)
Leek
Mango
Melon (all types)
Nectarine
Oranges
Pea
Pears
Peppers (except hot varieties)
Plums

Safe Vegetables & Fruits continued

Pineapple
Pomegranate
Prickly Pear (leaves or fruit—
dethroned)
Pumpkin
Quince
Radish
Raspberries
Rhubarb (no leaves)
Spinach
Strawberry
Squash—all edible varieties
Sweet Potato
Tangerines
Tomato
Turnip
Ugli Fruit
Vine Leaves (such as from
grapes)
Watercress
Watermelon
Yam

Always prepare items as you would for yourself such as removing seeds and pits. The key to good health is to vary items out each week. Look for what is in season. Avoid onions, garlic or lima beans, as they are difficult to digest. White potatoes are very starchy and should be avoided as well.

Safe snacks for sugar gliders

Snacks are OK for occasion. We should always give sparingly as many of the snacks can be fattening. Too many snacks given with processed sugar, can block your glider's ability to absorb calcium. Little doses go a long way. Never give any products containing chocolate.

Any type of dried fruit (no sugar is preferred)
Honey Sticks
Pet Pro Snacks such as O's or Friendchips
Mini Marshmallows
Yogurt Treats
Whole Grain Cereal such as non-sugared Shredded Wheat
Mealworms
Nuts Shelled—no salt
